TABLE OF CONTENTS

01 About Us

Our Story

CompLife Azerbaijan Web Studio has been operating since 2013.

Our professional and creative team has delivered many successful projects during this time.

The websites and mobile applications we design are distinguished for their high quality and complete security.

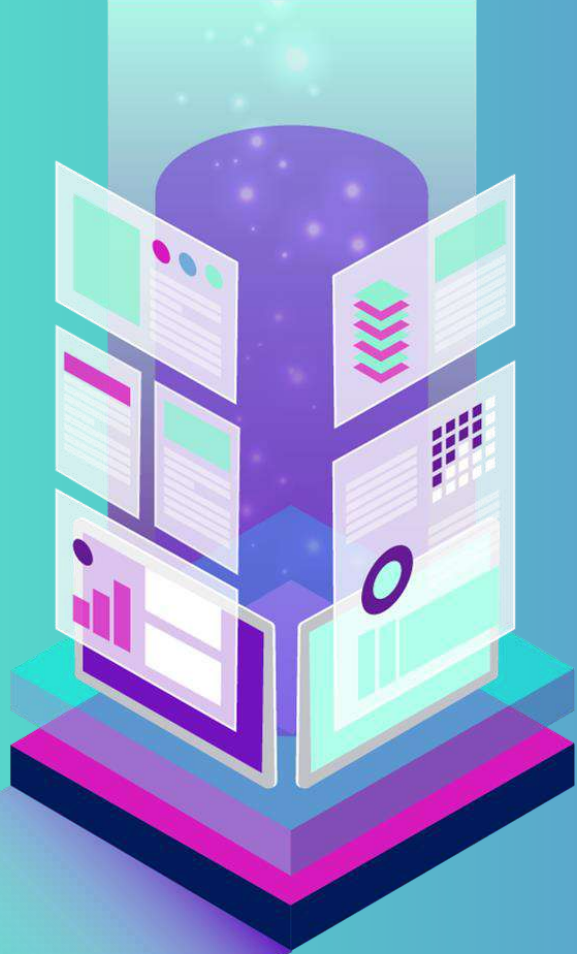

Our main goal is to help our clients create practical, aesthetic and unique web projects.

We mainly prefer aesthetics and practical design. We have also created a custom and very convenient control panel on our platform.

“Your Web Site - is primarily an advertisement
for your company on the Internet.”

Our Services

02

Our Services

Web Site / Mobile Adaptation

First of all, the site is a description, is a business card of your company on the Internet.

Mobile Application

Mobile application - is a dedicated mobile web application for Android and iOS platforms.

Video Animation / 360°

You can easily convey information about any product or service to your customers by creating animated ads!

Social Media Marketing

It is the promotion and advertisement of products or services on social networks.

Initial SEO / Optimization

A service of registration and indexing in popular search engines.

Web Site / Mobil Adapdation

The website provides information about your company, your products, portfolio, services, approach to various business areas, etc. is an information platform to create an idea about.

The development of the Personal Website is carried out in stages on the basis of the "Terms of Reference".

Websites are divided into two types by type:

- Individual - unique design, site assembled from scratch on the basis of terms of reference, admin-panel and completely secure
- Template - ready CMS and Design, minimum work and cost

- Individual designs are developed by the Web Designer, approved or edited by the client
- Encoding (html cut) is performed by the encoder
- Programming (admin-panel) is done by the programmer
- Finally, the Content Manager collects the material for the site in the and is delivered to the customer in a fully ready and working condition.

Mobile Application

We are program individual mobile applications on a cross-platform for Android and iOS, as well as web-based mobile applications that open right in the browser.

To keep abreast of new technologies and respond to innovations, companies around the world create and launch their own mobile applications that can make their business more efficient and effective.

Development steps:

- ✓ Idea and Planning
- ✓ Project Evaluation and Suggestions
- ✓ Terms od References
- ✓ Prototype preparation
- ✓ Prototype design
- ✓ Programming
- ✓ Application testing
- ✓ Uploading the finished mobile application to the Google Play and Appstore platforms

Video Animation / 360° Tour

Video Animation

Do you want your company to be more popular among customers? Therefore, first of all, you should think about its advertising. You can easily convey information about any product or service to your customers by creating animated ads!
